

Individual *Setup*

We work directly on your computer, using your own tools and examples - from organising project folders to getting more useful results from ChatGPT or other AI tools.

INCLUDED IN BOTH OPTIONS

What you learn in the workshop

The AI landscape

Understand the main AI tools and what could fit your work.

Context and memory

Why AI forgets, and how to give it useful working context.

Instructions and feedback

How clear instructions, examples and feedback shape the result.

From chats to workflows

How AI moves from answering questions to helping with recurring tasks.

Your knowledge base

How to organize your projects.

Tools, limits and responsibility

How connected tools and reusable skills fit together. Risks, privacy and human judgment.

Two options

OPTION 01

Workshop & Consulting

3-4 hours · In person or online

Understand AI, then apply it to your work.

- Full AI with context workshop · 90 minutes
- Review your current tools and workflows
- Improve how you use AI and organise your work
